Mimecast Outlook Plugin

05/21/2024 12:22 pm EDT

Basic information about how to use the Outlook Plugin for Mimecast.

Within Outlook, you'll see a tab labeled "Mimecast" in the menu:

0	-) -	100				Inbox - MS@tabush.com - Microsoft Outlook
File	Home	Send / Receive	Folder	View	Mimecast	
Search	*D Recent Se *D No Saved	arches * Searches + Archive	Archive Folders *	Report Spam	l₀ Block Sender ▼ l₀ Managed Senders co On Hold Messages ▼ Email Gateway	Account Options @ Help Peedback @ About Mimecast General

Options:

- **Block Sender**: You can highlight the email that you'd like to block from a sender or the sender's domain and select YES in the dialog box that appears.
- **On Hold Messages**: Quarantined emails being held for review. Click to view these emails. You can then reject, release, etc. from the pop-up window.

What is YOUR business missing? We've got the answers.

Highlight any of the quarantined emails you want to "release" or "reject."

Release Options:

- Release Message: Highlighted email will be released to your inbox.
- Release Message and Permit Address: Highlighted email will be released to your inbox and sender will be added to your auto-permitted list. This means emails from the sender's email address will flow through to your inbox normally.
- Release Message and Permit Domain: Highlighted email will be released to your inbox and entire domain will be added to your auto-permitted list. This means emails from the sender's domain will flow through to your inbox normally.

Reject Options:

- Reject Message: Highlighted email in quarantine will be deleted.
- **Reject Message and Block Address**: Highlighted email in quarantine will be deleted and future emails from the email sender will be blocked.
- **Reject Message and Block Domain**: Highlighted email in quarantine will be deleted and future emails from the domain will be blocked.

SPAM Options:

- SPAM: Report SPAM emails
- Phishing: Report email Phishing attempts
