## BOXTOP GUARDIAN

*The best tools alone cannot protect your firm from today's cyber risks. Proper protection requires the right tools, combined with a team of professionals continually monitoring behaviors on the network, which greatly enhances the ability to effectively secure your data and applications. Boxtop Guardian is our fully managed Security Operations Center as a Service (SOCaaS) that takes our security approach to the next level by enhancing our ability to proactively mitigate advanced targeted attacks.*

### WHAT IS BOXTOP GUARDIAN?

Boxtop Guardian leverages the power of people, processes, and technology to quickly detect and to remediate vulnerabilities, ensuring a proactive approach to cybersecurity. Our comprehensive, layered security defense, combined with real-time threat intelligence, identifies and responds to threats around the clock, without the need for your intervention, protecting your business-critical operations and valuable data.

- **24x7x365 "Eyes on Glass" Monitoring and Detection.**  
The Boxtop Guardian team performs constant, real-time monitoring of your Boxtop environment to ensure your applications and data are always safe from attacks by immediately detecting suspicious activity.
- **Real-time Investigation and Threat Hunting.**  
Analysts investigate every incident and conduct threat hunting to improve detection capabilities and find vulnerabilities that are not automatically detected.
- **Threat Analysis.** Boxtop Guardian examines threats to discover potential patterns of attack and vulnerabilities, as well as threat origins, scope, and risk levels to your firm.
- **Auto Remediation.** Boxtop Guardian has the ability to automatically isolate threats, accelerating and optimizing incident responses.
- **Rapid Incident Response and Notifications.** Boxtop Guardian will quickly contain any issues and provide notification of threats and remediation actions.

### WHY BOXTOP GUARDIAN?

Boxtop Guardian provides the additional defensive security measures in place to ensure your firm and assets are always protected.

- **Dedicated Cybersecurity Expertise.** Our team has the knowledge and skills necessary to combat cybersecurity threats so you never have to worry about security.
- **Cost-Effective.** Gain enterprise-level SOC monitoring and detection at a fixed and predictable cost without investing in expensive, complex systems. Boxtop Guardian can also quickly scale if your firm's needs change.
- **Transparent.** Obtain full visibility into the threat detection and investigation process. Regularly scheduled calls provide you the updates and reassurance you need, without having to worry about your firm's security on a day-to-day basis.
- **Compliance Standards.** Every aspect of our SOC meets the highest compliance standards, including ISO 27001, SOC2, HIPAA, and GDPR.

### OUR SECURITY PHILOSOPHY

Cybersecurity is always at the forefront of what we do and built into our solutions. By using the right tools, people, instating the right policies, and adapting our framework to combat new threats, we feel confident that our multi-layered approach ensures the highest level of security protection for your firm.
