How to Enroll Your Windows Device into Intune

This guide will help you enroll your Windows 10 or Windows 11 device into Microsoft Intune, which allows your organization to manage and secure your device. The process is similar for both Windows versions, with minor differences in the interface.

Step 1: Open Windows Settings

Begin by opening the Windows Settings application. You can do this in several ways:

- Press **Win + I** on your keyboard
- Click the Start button and select Settings
- Right-click the Start button and choose Settings

Step 2: Navigate to Accounts

In the Settings window:

1. Navigate to the **Accounts** section
2. Select **Access work or school** from the menu on the left side

Step 3: Connect to Your Organization

Now you'll begin the enrollment process:

1. Click the **Connect** button
2. When prompted, enter your work email address

Step 4: Sign In with Your Work Credentials

Enter your work credentials when prompted. This includes your username and password to authenticate your device with your organization. You may also need to complete multi-factor authentication if it's enabled for your account.

Step 5: Complete Intune Enrollment

Once you have signed in, your device will automatically begin the enrollment process with Microsoft Intune. During this process:

- You may see a message indicating *"This device is managed by your organization"*
- The enrollment may take a few minutes to complete
- Your device may download and install required policies and applications

Step 6: Verify Enrollment Status

To confirm that your device has been successfully enrolled:

1. Go back to **Settings > Accounts > Access work or school**
2. Select your work account from the list

3. Click **Info** to view enrollment details
4. Scroll down to **Device sync status**
5. Click **Sync** to force a policy or application synchronization if needed

Troubleshooting Tips

- If enrollment fails, verify that you're using the correct email address and password
- Ensure your device is connected to the internet
- Check that your Windows is up to date (Settings > Windows Update)
